IT Workforce Committee  
Co-Chairs  
*Janet L. Barnes*  
*Ira L. Hobbs*

Section 508 Liaison  
*Craig Luigart*

Cyber Security Liaison  
*Vance Hitch*

TO: Federal CIO Council Members  
FROM: Co-Chairs, Federal CIO Council IT Workforce Committee  
SUBJECT: 2006 Clinger-Cohen Core Competencies

We are pleased to present the 2006 Clinger-Cohen Core Competencies. In the ten years since the passage of the Clinger-Cohen Act, and the inception of core competency requirements for the IT workforce, each subsequent review has broadened and deepened the baseline IT Management knowledge and skills required for a CIO's staff. This year, competencies have been added for IT Portfolio Management, Records Management, Software Acquisition Management, Technology Management and Assessment, and Cross-Boundary Process Collaboration. In addition, we have enhanced the Information Security/Information Assurance competencies to reflect legislative requirements and information security standards, and increased emphasis on Earned Value Management, Privacy, and Information Sharing.

The review process was a collaborative effort among thirteen federal agencies, academic representatives from both the Department of Defense's Information Resources Management College and the CIO University Consortium, and private industry members from the Industry Advisory Council. The 2006 Clinger-Cohen Core Competencies and their associated learning objectives will be used as the foundation for IT course and curricula development, as well as the development and consistent implementation of IT workforce policy initiatives across the Federal Government. This biennial effort fulfills IT workforce management requirements set forth in both Section 11315 of Title 40 and Section 209 of the E-Government Act.

## **2006 Clinger-Cohen Core Competencies**

The Federal CIO Council promotes continuous learning and professional development for the IT workforce by ensuring the Clinger-Cohen Core Competencies and their associated learning objectives are updated every two years. These Competencies serve as a baseline to assist organizations in complying with Section 11315 (c) (3) of Title 40 (Clinger-Cohen Act) and Section 209 of the E-Government Act. Federal Chief Information Officers should ensure that the knowledge, skills and abilities represented in each competency are resident within their organization. More detailed learning objectives are provided in the [2006 Clinger-Cohen Core Competencies Learning Objectives](#) on the Chief Information Officers Council ([CIOC](#)) web site.

### **1.0 Policy and Organization**

- 1.1 Department/Agency missions, organization, functions, policies, procedures
- 1.2 Governing laws and authorities
- 1.3 Federal government decision-making, policy-making process and budget formulation and execution process
- 1.4 Linkages and interrelationships among Agency heads and COO, CIO, CTO and CFO functions
- 1.5 Intergovernmental programs, policies, and processes
- 1.6 Records management
- 1.7 Knowledge management

### **2.0 Leadership/Management**

- 2.1 Defining roles, skill sets, and responsibilities of Senior Officials, CIO staff, and stakeholders
- 2.2 Methods for building federal IT management and technical staff expertise
- 2.3 Competency testing - standards, certification, and performance assessment
- 2.4 Partnership/team-building techniques
- 2.5 Personnel performance management techniques
- 2.6 Practices that attract and retain qualified IT personnel

### **3.0 Process/Change Management**

- 3.1 Techniques/models of organizational development and change
- 3.2 Techniques and models of process management and control
- 3.3 Modeling and simulation tools and methods
- 3.4 Quality improvement models and methods
- 3.5 Business process redesign/reengineering models and methods
- 3.6 Cross-boundary process collaboration

### **4.0 Information Resources Strategy and Planning**

- 4.1 IRM baseline assessment analysis
- 4.2 Interdepartmental, inter-agency IT functional analysis
- 4.3 IT planning methodologies
- 4.4 Contingency and continuity of operations planning (COOP)
- 4.5 Monitoring and evaluation methods and techniques

### **5.0 IT Performance Assessment: Models and Methods**

- 5.1 GPRA (Government Performance and Results Act) and IT: Measuring the business value of IT-and customer satisfaction
- 5.2 Monitoring and measuring new system development
- 5.3 Measuring IT success
- 5.4 Processes and tools for creating, administering and analyzing survey questionnaires
- 5.5 Techniques for defining and selecting effective performance measures
- 5.6 Examples of and criteria for systems performance evaluation
- 5.7 Managing IT reviews and oversight processes

## **6.0 IT Project/Program Management**

- 6.1 Project scope/requirements management
- 6.2 Project integration management
- 6.3 Project time/cost/ performance management
- 6.4 Project quality management
- 6.5 Project risk management
- 6.6 Project procurement management
- 6.7 System life cycle management
- 6.8 Software development, testing and implementation

## **7.0 Capital Planning and Investment Control (CPIC)**

- 7.1 Best practices
- 7.2 Cost benefit, economic, and risk analysis
- 7.3 Risk management- models and methods
- 7.4 Weighing benefits of alternative IT investments
- 7.5 Intergovernmental projects--federal, state, and local
- 7.6 Capital investment analysis-models and methods
- 7.7 Business case analysis
- 7.8 Investment review process
- 7.9 IT portfolio management

## **8.0 Acquisition**

- 8.1 Acquisition strategy
- 8.2 Acquisition models and methodologies, from traditional to streamlined
- 8.3 Post-award IT contract management
- 8.4 IT acquisition best practices
- 8.5 Software acquisition management

## **9.0 E-Government**

- 9.1 Strategic business issues and changes associated with E-Government
- 9.2 Web development and maintenance strategies
- 9.3 Industry standards and practices for communications
- 9.4 Channel issues (supply chains)
- 9.5 Dynamic pricing
- 9.6 Consumer/citizen information services
- 9.7 Information Accessibility (including Section 508 compliance)

## **10.0 Information Security/Information Assurance (IA)**

- 10.1 CIO information security roles and responsibilities
- 10.2 Information security/related legislation, policies and procedures
- 10.3 Privacy and personally identifiable information
- 10.4 Information and information systems threats and vulnerabilities
- 10.5 Information security controls planning and management
- 10.6 IA risk management
- 10.7 Enterprise-wide information security program management
- 10.8 Information security reporting compliance
- 10.9 Critical infrastructure protection and disaster recovery planning

## **11.0 Enterprise Architecture**

- 11.1 Enterprise architecture functions and governance
- 11.2 Key enterprise architecture concepts
- 11.3 Enterprise architecture interpretation, development and maintenance
- 11.4 Use of enterprise architecture in IT investment decision making
- 11.5 Data management
- 11.6 Performance measurement for enterprise architecture

## **12.0 Technology Management and Assessment**

- 12.1 Network and telecommunications technology
- 12.2 Spectrum management
- 12.3 Computer systems
- 12.4 Web technology
- 12.5 Data management technology
- 12.6 Software development technology
- 12.7 Special use technology
- 12.8 Emerging technology
